Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

UPSTREAM

General Downhole Tools is committed to providing the HIGHEST quality drilling tools that operate in the HARSHEST of downhole environments in the least complicated way possible. Reducing operator costs and downtime is our objective.

<https://www.generaldownhole.com>

Engineering and production of downhole tools, specialized in completions, hydraulic fracturing, downhole tools, and multistage fracturing technology.

www.advancedupstream.com

McCoy Global Inc. delivers reliable, high-performance drilling & completion equipment, expert engineering support & responsive service to customers in 100+ countries.

<http://www.mccoyglobal.com/>. **Stand Number 3150**

NXL Technologies provides energy companies around the world with innovative coiled tubing and wireline pressure control systems that can be customized to your unique needs. Provides innovative equipment sales, rentals, services, and equipment repair to the worldwide energy sector.

<https://www.nxltech.com/>. **Stand Number 2464**

UPSTREAM

StimStixx Technologies Inc. produces a matrix acidizing solution which uses patented technology to clean wellbore perforation intervals. Uses a specially formulated solid acid stick (Slickline, wireline, coil tubing or tractor conveyed) delivering heated acid vapour with pinpoint accuracy.

www.stimsixxtechnologiesinc.com. **Stand Number 3172**

Volant delivers highly effective equipment and services to provide casing and liner solutions. At our core, Volant is a technology company. We design and manufacture new equipment to make your work productive, safer and easier. We do this through smart-design; it's our commitment to Doing more with less. <http://www.volantproducts.ca>

Stream-Flo Industries Ltd. manufactures wellheads, gate valves, check valves, and surface safety valves for the worldwide oil and gas industry. Our comprehensive services include field maintenance and installation, remanufacturing, customer property management, frac tree rentals, frac ball drop systems and isolation tools. <https://www.streamflo.com/en/>

Stand Number: Alberta Stand

DarkVision's award winning high-resolution acoustic imaging technology sets a new standard in downhole inspection - delivering unprecedented detail and intuitive results without the need for clear fluids. <https://darkvisiontech.com/>

UPSTREAM

Blue Spark Energy Inc. is a leader in high-pulsed power wellbore remediation on an international scale, providing a safe, cost-effective, and efficient solution for companies who share our vision of an innovative and environmentally sustainable oil & gas industry. Our BLUESPARK® technology is a revolutionary alternative to conventional wellbore remediation, which typically involve a lot of prep, logistics, manpower, and the use of potentially harmful fluids, toxins, and explosive technology.

<https://bluesparkenergy.com/>

An ISO 9001 Company

UPSTREAM Headwater Engineering is a company of seasoned professionals teamed to provide mechanical and structural engineering, design, and inspection services.

<https://www.hwengineering.com>

Coil Solutions opened in August 2007 to improve on quality and service of coil tubing equipment and downhole tools. We currently have almost 200 injectors in service to date. We also manufacture & service equipment for the world Oil & gas markets. From our Calgary, Alberta (Canada) base we design & manufacture well intervention & stimulation equipment in our 28,800 sq ft facility. We are an ISO 9001/2015 company in good standing since 2011, we also have our NSM from the Canadian government which we apply to all vehicles we manufacture.

www.coilsolutions.com

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

MIDSTREAM / DOWNSTREAM

Acme Engineering manufactures three distinct product lines

- Gas detection systems for building ventilation control.
- Process heating equipment for large commercial and industrial applications.
- Automatic scraper-strainers for intake, process and effluent filtration.

www.acmeprod.com

Engineer, manufacture and assembly of Pigging Valves, Cementing Equipment, Pressure Switches, and Inline Ball Check Valves. www.argusinovates.com

With over 30 major designs in use, and a multitude of handling tools, lifting systems, industrial walkways, piping systems, trailer designs and modifications, overhead lifting systems, pipe and handling systems, tanks, equipment attachments, and highway signs we provide proven design capability. www.ketek.ca

Tartan Energy Group is a leader in the Oil & Gas Engineering and Services industry. Our products and services are cutting edge, and we provide our clients with products & solutions for the following services: Drilling & Completions, EPC and EPCM, Gas Processing Engineering & Design, Well Service Solutions, Automation and AI. <https://tartanenergygroup.com/>
Stand Number 2461

MIDSTREAM / DOWNSTREAM

Gas processing equipment - Mechanical Refrigeration/ LTS/ J-T Packages, Turbo-Expander based Cryogenic Gas Processing, TEG & Molecular Sieve based Dehydration Units, H2S & CO2 Removal/ Gas Sweetening, NGL Fractionation Units & Turnkey execution of Gas Processing Facility. www.5blue.com

Blackline Safety creates world-leading connected safety, gas detection, lone worker, area monitoring, cloud software and data analytics tools. www.blacklinesafety.com

Winters Instruments is a global manufacturer of premium quality pressure and temperature instrumentation, with distribution partners in over 90 countries. Visit www.winters.com to view our extensive list of products and distributors. www.winters.com. **Stand Number 3570**

Leading supplier for the design and manufacture of shell and tube and air-cooled heat exchanger products. <https://www.exchangerindustries.com>

First in Service, First in Quality Tools

Backed by experience and fueled by innovation, Import Tool has been a leader in the industry for over 70 years, specializing in liner tool completions, heavy oil, SAGD/CSS technology, stage cementing tools, and inner string cementing services. <http://importtool.com/>

We operate across North America and beyond—powering industry, empowering society and safely delivering reliable, affordable sources of energy through our four core businesses: - Liquids pipelines - Natural gas pipelines, - Gas distribution and storage - Renewable energy

MIDSTREAM / DOWNSTREAM

Composite pipes and tanks. Shawcor Ltd. is a leading global company specializing in products, services and solutions for the water, energy, infrastructure and transportation markets. We continually pursue sustainable solutions that protect the environment, conserve resources and extend asset life. www.shawcor.com. **Stand Number 6150**

C-FER Technologies focuses on facilitating the use of leading-edge technology by Oil & Gas and Pipeline operators involved in the development of very challenging resources, such as heavy oil, deep water offshore and in the Arctic. <https://www.cfertech.com/>

Rysco International is a global provider of comprehensive Corrosion Management solutions for the energy industry, offering services, equipment, and expertise in areas such as Internal and External Corrosion Services, Engineering & Design, Pipeline Analysis, and more. <https://www.ryscocorrosion.com/>. **Stand Number 9530**

Enerflex is a publicly traded, premier integrated global provider of energy infrastructure and energy transition solutions, covering gas processing, compression, power generation, refrigeration, cryogenic, and water solutions <https://www.enerflex.com>

Kings Energy Services is an established valve, electrical, instrumentation and measurement company. At Kings Energy we provide top quality products and services and maintain these results through the implementation of API Q1 and ISO 9001:2015. <http://www.kingsenergy.com> **Stand Number 2463**

Developer of measurement devices for the natural gas processing industry. We produce H₂S / Total Sulfur analyzers, Moisture monitors, O₂ analyzers, CO₂ analyzers, Gas Chromatographs and Optical Hydrocarbon analyzers.

<http://www.envent-eng.com>

New World Technologies Inc. has become a leading Canadian manufacturer of pneumatic, battery powered, and electronic pistol grip torque wrenches which are marketed under the RAD trademark. RAD products have proven to be successful all over the world in such industries as oil & gas, petrochemical, mining, aerospace, power generation and manufacturing. Wholesale distribution of industrial machinery and equipment.

<https://www.radtorque.com/>. **Stand Number 3258**

2009 Frost & Sullivan Award Winning sensor generates & measures stimulated brillouin scattering in optical fibers to provide high-resolution simultaneous measurements of strain and temperature along the entire fiber length. By wrapping or embedding a standard telecom fiber inside a structure such as an oil pipeline, power lines or dam, users can detect when and where the structures is being strained or heated and correct the problem before failure occurs. It is ideal for monitoring large structures including oil & gas pipelines, bridges, power lines, dams, and security fences. The sensor could also be used in detecting fire and corrosion/erosion. www.ozoptics.com

Stand Number 3158

INGU's Pipers[®] technology is the most efficient and economical pipeline inspection solution to achieve Net Zero and ESG compliance for the water and oil & gas pipeline infrastructure. The patented self-serve approach gives full control to the pipeline operator and is designed to actively monitor changes in pipeline condition. <https://ingu.com/>

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

ENVIRONMENTAL – DECARBONISATION

Emissions solutions for a global energy transformation.
<https://www.carbonconnectinternational.com>

GHGSat uses its own satellites and aircraft sensors to measure greenhouse gas emissions directly from industrial sites; providing actionable insights to businesses, governments, and regulators
<https://www.ghgsat.com/en/>. **Stand number 12312**

Develop, Manufacture and Sell energy efficiency products for the Oil and Gas sector. Specifically produce the MagnoDrive, a Direct Drive Permanent Magnet Motor Top Drive for PCP Applications, an Actuator used in Solar Powered Chemical Injection and Compression to replace pneumatic pumps and controllers in off grid well locations and select tools including a Rod Shear for down hole rod string protection. <https://generalmagnetic.ca/>

SkyPower is the largest and one of the most successful developers and owners of utility-scale solar energy projects in the world. With roots dating back more than 15 years, SkyPower's global team possesses a vast track record of over 1000 years of combined experience in power and large infrastructure projects.
<https://skypower.com/>

The Petroleum Technology Research Centre (PTRC) is a not-for-profit corporation founded in 1998 to facilitate research, development and demonstration projects to reduce the carbon footprint and increase the production of subsurface energy. PTRC seeks to support industry, governments and research providers to realize their environmental, social and governance needs. <https://ptrc.ca/>

ERA was created in 2009 to help deliver on the province's environmental and economic goals. ERA takes action on climate change and supports economic growth by investing in the pilot, demonstration and deployment of clean technology solutions that reduce GHGs, lower costs, attract investment, and create jobs in Alberta.

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

LOGISTICS

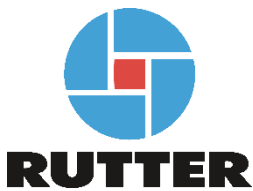

CruxOCM works with the human in the control room, finding efficiency and safety through automation that will revolutionize heavy industry control room operations. <https://cruxocm.com/>

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

DIGITALIZATION

Belca Soft Corporation develops, customizes, and implements specialty Oil and Gas operations management software (RigER) for equipment rentals and service companies. Since 2012, RigER has been helping oilfield workers deliver energy worldwide. As an innovative cloud-to-mobile solutions provider, RigER improves operations by converting traditional “paper and whiteboard” information management processes into a user-friendly digital system, allowing for operational efficiency and cost optimization for oilfield rental and services companies. RigER allows oilfield executives to manage work at all stages of value generation: quote and rental agreement, job scheduling, rental fleet management, oilfield calendar monitoring, field tickets, delivery tickets, asset tracking, management reports, analytics and more. <https://rigger.us/>

Rutter research, develop, deploy, and support proprietary hardware and software that dramatically **improves visibility and functionality** of conventional marine radar systems. Ice Navigator, Current Monitor, Oil Spill Detection, Small Target Surveillance, WaMoS II, WaveSignal, and Wave Vision. <http://www.rutter.ca>. **Stand Number 3255**

Copperleaf provides enterprise decision analytics software solutions to companies managing critical infrastructure. We leverage operational and financial data to empower our clients to make investment decisions that deliver the highest business value. <https://www.copperleaf.com>

Gloriosa Energy Solutions: Data centers off-the-grid powered by LNG & hydrogen. Closing off a vulnerable point of entry through the grid. Energy generators and providers of electricity. <https://gloriosaenergy.com/>

ENSIGN is a global technology leader in the oilfield industry. We've achieved numerous industry firsts, including Canada's first horizontal well drilling and pioneering PLC technology on automated drill rigs. Today, we're one of the world's largest and most advanced oilfield service providers, offering premium services like contract drilling, directional drilling, and well servicing—all with a strong emphasis on safety. <https://www.ensignenergy.com/>

Interface Fluidics is a technology company making high-pressure high-temperature fluid analysis fast, accurate, and accessible. Specializing in EOR, PVT and Phase Behaviour, CCUS, Hydrogen, and general fluid compatibility for reservoir and completions engineering, Interface's SapphireLab microfluidic platform makes fluid analysis faster and more repeatable than traditional platforms such as PVT Cells and Core Flooding systems. <https://www.interfacefluidics.com/>. **Stand Number 2466**

Basetwo offers an AI platform for engineers to quickly deploy self-learning simulation models, enhancing refining and gas operations. Our platform provides real-time recommendations to reduce emissions, save energy, and optimize critical equipment and processes, while also improving yield, quality, and time to value. Fortune 500 manufacturers have achieved a remarkable 44% efficiency improvement in distillation processes and a 25% reduction in chemical and energy costs with our solutions. <https://www.basetwo.ai/>

At Cleantek Industries we imagine, design, patent, manufacture, and market intuitive, technology-based equipment that requires less fuel, minimal maintenance and low operating cost - all while preserving the environment. <https://cleantekinc.com/>

DIGITALIZATION

KDM Analytics offers time and cost-saving solutions for risk assessment. Our software automates NIST RMF assessment for operational technology (OT) systems, providing unique top-down and bottom-up analysis. With our products, organizations achieve fast, repeatable, and evidence-based cybersecurity risk assessments. Led by cyber defence experts, KDM Analytics is the trusted choice for mission-critical cyber systems in both public and private sectors. <https://kdmanalytics.com/>

Rugged Monitoring has a team of industry leading fiber optic experts with 100+ years of combined experience and are committed to deliver customizable solutions for challenging applications. Our team of experts leads through product innovation to deliver best in class reliability. We deliver reliable, high performance, precision sensors and monitoring solutions. <https://www.ruggedmonitoring.com/> **Stand Number: New Pav**

Virtual Marine, based in Newfoundland and Labrador, Canada, is a global leader in lifeboat simulation and fast response boat training. With deep expertise in harsh environments and advanced software, VM employs machine learning and AI to enhance workplace training. Specializing in custom lifeboat and small craft simulation, Virtual Marine leads this field and pioneers digital twin technology for upstream energy markets. Their comprehensive training solutions range from desktop VR trainers to full mission cabins, boosting seafarer competence and setting industry standards. VM introduced lifeboat simulation to the offshore sector and supports global adoption at the request of major energy companies. <https://www.virtualmarine.ca/>

DIGITALIZATION

Turkana was founded in 2013 with a foundation based on decades of experience imaging in the Medical, Defence, Oil and Gas, and Manufacturing Industries. Its key goal has been the development of downhole hardware for 3D reservoir imaging and mapping. Headquartered in Calgary, Alberta, Canada, Turkana offers its specialized subsurface visualization services to solve the industry problem of seeing beyond the borehole. <https://turkana.ca/>

DataCan is a worldwide supplier of innovative, high-performance pressure and temperature recording devices and systems, as well as autonomous, instant-close, multi-cycle downhole shut-in tools and permanent monitoring systems. The team also manufactures and supports the Lee Specialties line of Production Logging Tools, Data Acquisition Systems, and Measuring Heads.

LlamaZOO Interactive is an award-winning software development studio creating 3D communication solutions for enterprise and industry 4.0. We specialize in digital twin visualization, immersive training simulations, and the transformative power of combining siloed big datasets; making information digestible and actionable for all stakeholders through engaging 3D & AR/VR solutions.

We deliver the most powerful and comprehensive work execution **digital platform**, focused on **people** and **processes** to ensure that your **digital transformation** will maximize production output and minimize maintenance costs. <https://cimaintenance.com/>

Manage Petro is an inexpensive cloud-based back-office solution that is easy to learn, unlike other back-office solutions that are hard to learn and cost over 300k to start. We are a smart business solution, designed exclusively for small growing fuel delivery companies. Helping you create an invoice in less than 1 minute and optimize the entire delivery process from dispatching to invoicing.

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

DRONES

The logo for DroneXperts, featuring the word "DRONE" in white on a black background, followed by "XPERTS" in white on a black background, with a stylized 'X' between them.

UAV solutions. DroneXperts is a pioneer and leader in Canada, DroneXperts is an innovative center of expertise that offers you technology (sale, rental), training, advice, service and repair in one place. <https://www.dronexperts.com/>

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

FIRE PROTECTION

The logo for DuraSYSTEMS, featuring the word "Dura" in a stylized red font and "SYSTEMS" in a black font.

DuraSystems Barriers Inc., is a Canadian company that custom designs and supplies Passive Fire (& Blast) Protection Systems for Industrial, Institutional & Infrastructural projects globally. Our designs are most suited for the hydrocarbon facilities.
www.durasystems.com

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

GOVERNMENT

Connecting you with government news, services & career opportunities. <https://www.alberta.ca/index.aspx>

Stand Number 2463

The Saskatchewan public service describes the people who work for the Ministries and Agencies of the Government of Saskatchewan. We serve the people and the province in areas such as environmental protection, agriculture and forestry, highway and road maintenance, health services and many, many more. The Government of Saskatchewan public service is one of the largest employers in Saskatchewan. We employ approximately 12,000 people with offices located across the province. <https://www.saskatchewan.ca/>

The Canadian Trade Commissioner Service (TCS) helps Canadian businesses of all sizes succeed in international markets and make better, timelier, and more cost effective decisions.

Edmonton Global is a FDI and international business development agency that attracts FDI and promote the region as a top location for sustainable investment and help local companies to help expand their international reach through trade and export. <https://edmontonglobal.ca/>

Business-to-Business Networking Program ADIPEC 2023 2nd – 5th October

PROJECT MANAGEMENT, ENGINEERING, CONSULTANCY

Pursuing positive change by partnering with our clients in the infrastructure, energy, and metals industries.

<https://www.hatch.com/Expertise>

Remedy has provided quality consulting and project management services to the Oil & Gas Industry since 1991 in Canada and internationally. Remedy specializes in: 1) Well Engineering and Execution; 2) Underground Energy Storage for safe and cost-effective storage of Hydrogen, Oil, Gas and Carbon Capture while minimizing environmental impact and reduced risk from natural disasters and terrorism; 3) Developing Geothermal Energy with current projects in Canada, Colombia, and Ecuador.

<http://www.remedenergy.com>

E&I and automation experts in the Oil & Gas and Utilities industries with a strong global track record of success. <https://drakken.co/>

Hamdon Energy Solutions, a key player in the oil and gas industry since 1996, emphasizes high-quality products, cutting-edge technology, and value-added services. As the leading Echometer distributor in Canada and India, we offer sales, service, and technical support. Collaborating with Echometer, we deliver innovative, cost-effective solutions for upstream oil and gas companies worldwide, encompassing equipment sales, support, and annual maintenance. Our dedicated team of engineers and technicians leverages their expertise to provide valuable insights, empowering customers to make informed decisions for their operations.

<https://hamdon.net/>

Founded in 1994, Spartek Systems is a rapidly growing developer, manufacturer, and marketer of leading-edge surface and subsurface instrumentation. Spartek's R&D, Center of Excellence, Manufacturing, Quality Assurance & Testing is based in Alberta, Canada with After Sales Support Facilities around the world. <https://www.sparteksystems.com/>
Stand Number 3164

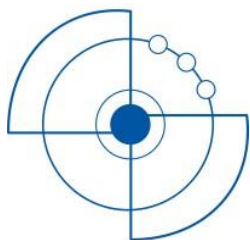

EVANS design and equip Control rooms in Oil & Gas Industry ,however we serve a diverse client base including; public safety, aviation, process control, utilities, and technology, as well as numerous government agencies. EVANS has been the global leader in providing innovative solutions for mission-critical operations from Consulting services, Design services to execution phase which could include construction of Control rooms and manufacturing of consoles (technical furniture) EVANS leverages this experience and capabilities as it allows us to consider all aspects of the control room design process, regardless of the type of engagement we are working on.
<https://www.evansonline.com/>

Technical and commercial expertise that drive value from resource assets around the world. Sproule is a global energy consulting and advisory firm helping clients navigate the world's evolving energy system. Our services create value by increasing shareholder confidence through trusted and independent analysis, optimizing operational performance, and strategically advising on M&A transactions and energy markets. <https://sproule.com>

The WellBoss Company, wholly owned by Schoeller-Bleckmann Oilfield Equipment AG, designs and manufactures the industry's most reliable well completion technology, delivering unrivaled, data-driven performance and cost-effective solutions for operators looking to optimize their frac operations. <https://thewellboss.com/>. **Stand Number 3160**

Miquelon Meter Services provides Daniel™ meter runs to fabricators, plants, engineering companies, testing companies and direct to end users in more than 36 countries around the world. Our list of end users using our meters reads like the who's who of every major gas and Oil Company in Canada, the United States, Europe and the Middle East. Companies such as Total, Talisman, Shell, Husky, Exxon, Petro Canada, Pemex, Weatherford, Halliburton and more use our meters on a daily basis with over 25,000 units built.

<http://www.miquelonmeter.com/>

PerLogic Ltd. is a private Canadian-based corporation specializing in procurement and supply chain services. Providing high quality products to our clients in a timely and efficient manner is of absolute importance to us. We are dedicated to providing products that are expert-vetted and according to our strict compliance protocols, working with regulators and others around the world to secure the right products. <https://www.perlogic.ca/>

Enviro-Experts is a sustainability-focused consulting firm offering services like Environmental Impact Assessments, Engineering, and Renewable Energy development. They collaborate closely with clients to tailor solutions for reducing waste and energy consumption, helping them achieve their sustainability goals. <https://www.enviro-experts.com/>

Hydrogen Optimized™ is a Hydrogen Technology focused project company. We develop and implement projects for clients and partners using our innovative hydrogen capabilities. We work with clients and partners to move projects forward through conceptualization, commercialization and scaling in the market. With the world's premier hydrogen heritage, we develop, design, and build innovative Green Hydrogen technologies and processes.

SEAMOR Marine are pioneers in the global Inspection Class underwater ROV market, tracing our roots back to the first prototype, developed in 1989. Proven time and again in the toughest environments worldwide in the commercial, government and science sectors, our hyper modular ROV systems are expandable, reliable, adaptable and easy to use and service. SEAMOR vehicles offer exceptional value, durability and portability and come with industry trusted world class support.

General Magnetic Canada Inc. (GMCI) is a privately held Canadian company headquartered in Calgary, Alberta. GMCI provides the Oil & Gas industry with a range of products targeting **methane emission reductions** and **energy efficiency**, important for climate change mitigation as well as concurrently delivering **operating cost savings**. GMCI has concentrated its business on the development, manufacture, and sales of Best-in-Class proprietary permanent magnet motor technology with a focus on the energy industry.

Founded in 1981, the HRS Group operates at the forefront of thermal technology, offering innovative and effective heat transfer products worldwide with a strong focus on managing energy efficiently. For over 40 years, HRS products and systems have been used in such sectors as HEVAC, food manufacturing, chemicals, pharmaceuticals, the water and energy industries, Waste-to-Energy and environmental protection.

Our heat exchangers fall into several categories: gasketed or brazed plate; shell and tube; corrugated tube; scraped surface; and others. We also produce rapid batch reactors, evaporators, calorifiers, and many other packaged units based around our heat exchanger products. <https://www.hrs-heatexchangers.com/>

lifting Solutions is a high-performing team that engineers and manufactures artificial lift products and delivers services to optimize oil and gas production systems. With facilities throughout the world, our team of technical specialists have the knowledge and experience to support your lift needs. <https://www.liftingsolutions.com/>. **Stand Number 3253**

Sky Eye Measurement is a leading provider in automated gas and liquid measurement equipment, serving customers across North America. We are wholly committed to delivering safe, effective, leading-edge measurement solutions to our clients, and our success is entirely dependent on the dedication and technical expertise of our employees and the support of our amazing customers. <https://www.skyeye.ca/>
Stand Number 2463

C&C PetroGas Engineering (CCPGE) is an engineering consulting firm specializing in innovative solutions for oil and gas industries in the following areas:

1. Advanced static/dynamic/transient finite element analysis and CFD
2. Pulsation, mechanical, torsional vibration analysis, skid design and structural analysis of reciprocating compressor packages
3. Fitness for services (FFS) assessment and asset integrity threat management
4. Pipeline integrity management and plant service
5. Design and stress analysis of transmission pipeline, piping systems, pressure vessels, and compressor packages
6. Coupled vibration analysis and design of offshores platforms, compressors and rotating equipment.

<https://www.ccpge.com/>

We provide the oil & gas industry with [innovative, pre-engineered](#) production and [power equipment](#), faster, at a lower cost. OilPro is a trusted oilfield production equipment supplier since 1997. OilPro's experience in sourcing, sizing and supply of oilfield production equipment to some of the world's largest (and smallest) producers, plus our inventory of key production equipment, is designed to fit most in-house E&P design standards. Our fabrication partners build OilPro-designed inventory which gives us the ability to offer new, customized and re-manufactured products to get production on stream quickly and affordably. Key to our success is ensuring all of our equipment meets or exceeds Canada's world-class technical and safety standards. We specialize in combining standard equipment with innovative components such as [Innopipe](#), and [PowerGen](#).

Westpower is a leading North American rotating equipment solutions provider with services spanning industrial and engineered pumps, fabricated engineered fluid systems, reliability and lubrication products, field service and repair solutions that enhance performance. Headquartered in Calgary, Canada, we have operations in Edmonton, Vancouver, Grande Prairie, Salt Lake City, and Denver.

CarbonCure creates carbon removal technologies that introduce recycled CO₂ into fresh concrete to reduce its carbon footprint, without compromising performance. Once injected, the CO₂ undergoes a mineralization process and becomes permanently embedded in the concrete. This results in economic and climate benefits for concrete producers—truly a win-win

Founded in 1981, the HRS Group operates at the forefront of thermal technology, offering innovative and effective heat transfer products worldwide with a strong focus on managing energy efficiently. For over 40 years, HRS products and systems have been used in such sectors as HEVAC, food manufacturing, chemicals, pharmaceuticals, the water and energy industries, Waste-to-Energy and environmental protection.

Our heat exchangers fall into several categories: gasketed or brazed plate; shell and tube; corrugated tube; scraped surface; and others. We also produce rapid batch reactors, evaporators, calorifiers, and many other packaged units based around our heat exchanger products. <https://www.hrs-heatexchangers.com/>

Founded with the vision of delivering project services in new and better ways, we are a company that holds progress and innovation as our standards, and it is this identity that generates solutions that are years ahead of their time. We employ leading-edge technology to stay at the forefront of our industry, and to continually create superior solutions that are truly innovative and beneficial, not only to our clients and our industry but to our world.
